

CHAPTER 3

RESEARCH METHODOLOGY

3.1 INTRODUCTION

In research methodology, the method and procedure will be discussed to accomplish the objective. In this chapter, the literature review comprised a questionnaire survey is a method was used to guide the research. In this foreign labour in construction issues, the literature review was constructed to guide the issues. To collect information, the questionnaire survey was selected. The information in questionnaire survey contain about the objective it is cause and ways to minimize the reliance of foreign labour in construction field. Next, the data or information from questionnaire survey will be finalized and analyze through quantity and qualitative method and the result from survey will be review. Finally, to guide the reader to acknowledgement the research, the conclusion and the recommendation will be obtain.

3.2 OUTLINE THE RESEARCH PROCESS.

In solving problems a systematic Research methodology is a way. It is a science of studying how research is to be carried out. Essentially, the procedures by which researchers go about their work of describing, explaining and predicting phenomena are called research methodology. It is also defined as the study of methods by which knowledge is gained. Its aim is to give the work plan of research

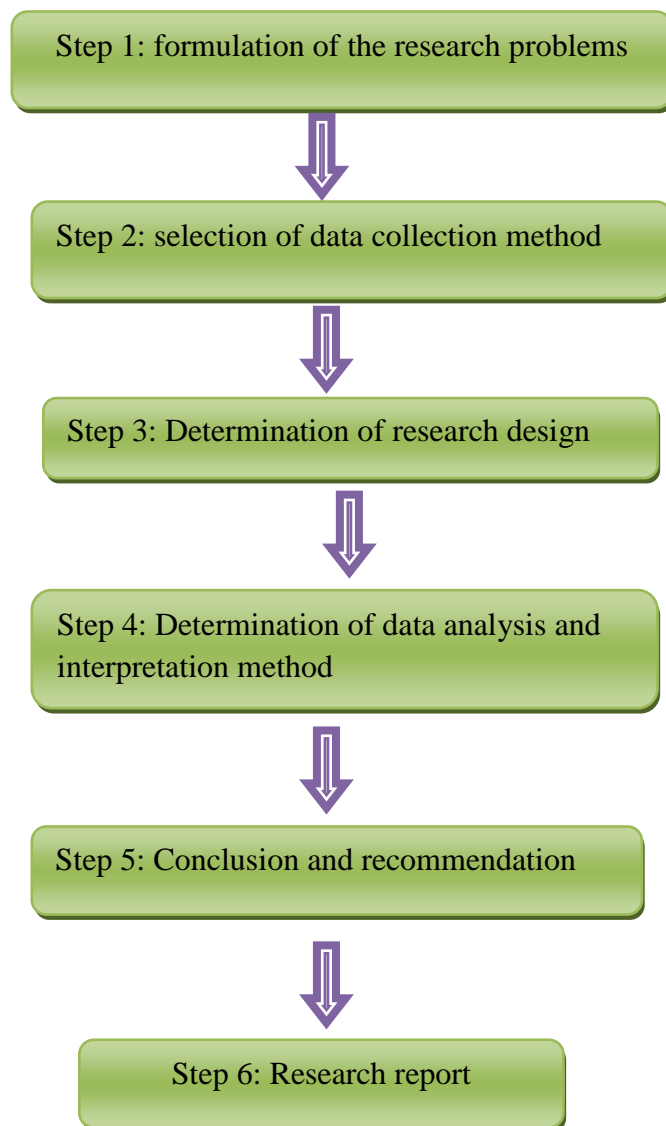

Figure 3.1: Outline The Research Process.

3.3 FORMULATING THE RESEARCH PROBLEM

In process of research is a needed crucial step and become first steps for starting. In this we can found out what the discussion where it needed to decide where it is the main function of these steps. The steps of formulation of problems can be determined with following these steps:

3.3.1 Identification for Research Topic

In research, identify the research topic is the first step in starting of research. In preparing this research, personal interest is as a starting point in an organization where identifying research topics. In addition, to avoid wastage of time affect the research, time taken need to consider getting as research excellence.
